

Having access to K-Love signal on the FM translator service is very important to me. It is clean, encouraging, safe music for everyone to hear. I know so many people who listen to, and are encouraged by, this station, in a way no other station is able to do. Because I appreciate this station so much, I am a financial supporter of this station. It is important to keep this type of broadcasting accesible to us because it is family value oriented, "safe", uplilfting, and encouraging for all members of the family. I personally hundreds of people who regularly listen to this station, and it would be a great loss to hundreds of communities if it were not available. Please do not override their ability to broadcast through the FM translators they use. Thank you.
